

EASTERN LONG ISLAND HOSPITAL FOUNDATION

2022 YEAR IN REVIEW

Dear Friend,

Z. Micah Kaplan here, and it is my privilege to be this year's Chair of Eastern Long Island Hospital (ELIH) Foundation Board of Directors. Since 1905, our small community hospital has served and saved countless lives each year. When I was given the opportunity to join the ELIH Foundation, I immediately knew it was something that I could do, and in some small way, serve by giving back to the community where I have lived and loved raising my family. For my fellow Foundation members to choose me as this year's Chair is an immense honor and an immense responsibility.

Our Foundation consists of volunteers in and around the North Fork and Shelter Island who strive to provide financial support and promote ELIH Foundation as an integral component of our rural community's health care system.

Gifts to our Foundation provide the financial resources and flexibility to support a variety of wide-ranging programs and services as well as the purchase of state-of-the-art equipment and new technology. These gifts are the building blocks of our philanthropic efforts, supporting the day-to-day work of Stony Brook Eastern Long Island Hospital (SBELIH).

Last year we were able to support our community by enhancing our healthcare portfolio with many new pieces of innovative technology. These include a OEC Elite Surgical Imaging C-Arm to enhance our operative procedures; all new Intravenous Fluid Pumps for the hospital; and all new patient care stretchers. We also renovated our Behavioral Health Recreation Room and ER Waiting Room, started a new Wound Care Center and were able to modernize our Diagnostic Radiology Center with all new equipment and new rooms. As a result of these advances, our physicians here at SBELIH were able to transform and empower the hospital's delivery of care.

Together, we are grateful for your ongoing generosity, and please know: every dollar raised through ELIH Foundation remains local, to benefit your hospital and the community it serves.

Best wishes to you and yours in the holiday season and New Year.

Z. Micah Kaplan, MD
Chairman

All we do is all for you.

In March 2021, We Began Developing Our New Advertising Campaign for Stony Brook Medicine.

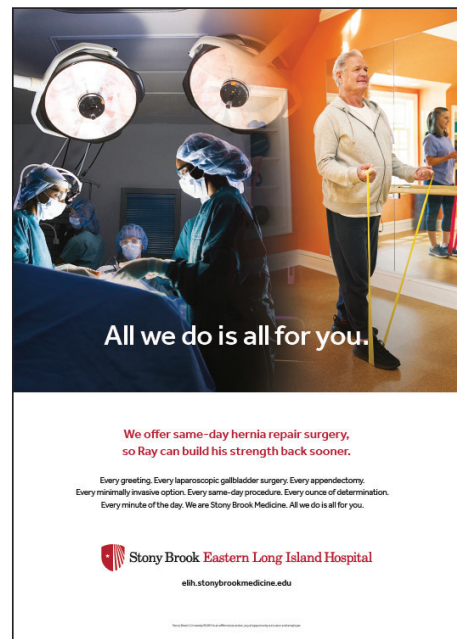

As the leading academic health center on Long Island, we have a wealth of attributes that we wanted to highlight in the campaign:

- World-class practitioners, educators and researchers
- Access to leading-edge research, advanced treatments, the latest clinical trials and technologies
- The devotion, expertise, drive, and compassion of our people
- Pushing the boundaries of biomedical research
- Our dedication to the care and lives of residents of Long Island and beyond

After conducting research, with the public and within Stony Brook, we landed on an overarching core message that sums up all of those attributes in one word: **Strength.**

All we do is all for you.

Our advertising campaign, which kicked off in Spring 2022, is built around the brand value of strength. Much of the campaign features a split between the medical services provided by Stony Brook and the positive outcomes resulting from our care. This conceptual direction allows us to demonstrate not only the world-class care that Stony Brook provides, but also the life-changing results that this level of care delivers to our patients.

Expanding Health Care to the North Fork and Shelter Island

Peconic Landing, in Partnership with Stony Brook Medicine, Opens Expanded Center for Well-Being

Peconic Landing and Stony Brook Medicine teamed up to open an expanded Center for Well-Being to North Fork residents.

The expansion will enhance the primary care already available there by adding 1,200 square feet of space and six new exam rooms. It will also bring additional specialty services, including rheumatology and orthopaedics.

The expansion of the Center for Well-Being also establishes an office space specifically for Peconic Landing's growing home health service capability, which offers personal care assistance, nursing and more to those who prefer to maintain their independence from home.

Stony Brook Medicine Advanced Primary and Specialty Care: Comprehensive and Personalized Care in Mattituck

Stony Brook Medicine Advanced Primary and Specialty Care brings multi-specialty, expert care to the North Fork. Our brand new, state-of-the-art facility offers a wide range of specialties - all under one roof, including:

- Orthopaedic Care by North Fork Orthopaedic and Sports Medicine and East End Hand Center
- Primary Care for the LGBTQ* Community by Partners in Primary Care
- Pulmonary Care by Meeting House Lane Medical Practice
- Surgical Care by Stony Brook Surgical Associates - Division of Vascular and Endovascular Surgery

A New Comprehensive Wound Care Center at SBELIH is Now Seeing Patients

We launched the Wound Care Center, led by Dr. Hughes and the preparation and launch were supported by our colleagues at Stony Brook Southampton (SBSH) hospital. This center expands outpatient wound care services to the North Fork and Shelter Island. This new care option is for patients with acute wound injuries as well as those with chronic or slow healing wounds. The center offers services previously requiring travel west of Riverhead. The Wound Care Center will offer new, innovative, cutting-edge wound care options. Patients will also have access to general surgery, podiatry, orthopedics, and hand surgery expertise. The center will provide access to state-of-the-art equipment and new wound-healing technology right here on the North Fork.

Kenya Clinton Coles, MSN, RN
Nurse Manager, Quannacut
Detox/Rehab Units
SBELIH 1199 Nurse Leader
of the Year nominee

Prestigious Theodore Roosevelt Award

Helene V. Fall, President of the Eastern Long Island Hospital (ELIH) Auxiliary, was presented with the prestigious Theodore Roosevelt Award on October 24th, 2022.

The Nassau-Suffolk Hospital Council created the Theodore Roosevelt Award in 1958 to honor those who demonstrate exceptional volunteer commitment to a hospital and its community. This honor is not awarded to a recipient each year, but only when a candidate makes exemplary contributions on behalf of the hospital and demonstrates outstanding efforts in volunteerism. These criteria reflect the award’s namesake’s life-long devotion to public causes. President Theodore Roosevelt— a renowned resident of Long Island himself— is a firm model of the spirit to be recognized in this award.

Like all past recipients of this prestigious award, Helene has given something of herself to be incorporated into our hospital. Without her and each of the recipients who have come before her, our non-profit hospital could not exist as we have come to know it.

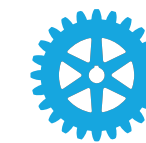

The acknowledgement of the invaluable services rendered to the hospital by volunteers like Helene has become an integral part of SBELIH’s mission.

Helene is currently the President of the ELIH Auxiliary, having served as Second Vice President and First Vice President. Helene is interim Chairperson of Volunteer Services, Car Raffle Chairperson and Chairperson of the Dream Green Extravaganza. In addition, as Auxiliary President, Helene serves on the ELIHA Board, the ELIH Foundation Board, and the SBELIH Joint Advisory Committee. Helene is also a member of the Greenport Rotary and a Paul Harris Fellow.

Helene’s selfless service and dedication to ELIH over the past 11 years has left a lasting impression on the entire hospital, community, and all of those who have been lucky enough to encounter her along the way.

Greenport and Southold Rotary Clubs Present ED Team with The Laura Goodale Award

The Greenport and Southold Rotary Clubs presented SBELIH Emergency Department (ED) with the Laura Goodale Award. Every year, the Laura Goodale Award is given to a SBELIH employee who embodies the legacy of Laura Goodale.
